

Battery Test Systems

Greenlight Innovation:

A Leader in Electrochemical Test Systems Since 1992

- Turnkey battery test systems for EV and HEV applications
- Batteries, ultracapacitors and fuel cells
- Services ranging from test lab design to installation
- Safety system integration
- Diagnostic tools
- Test systems for cells, packs and modules
- Environmental chambers

State of the Art Software:

- Fully automated, 24/7 operation
- Drive cycle capable
- Data management and analysis
- Centralized control with remote access
- Software retrofits for existing labs
